

a Dataset size

	Binary	Ternary
Data points	23,061	5,229
Systems	700	126
Components	333	125

b Thermodynamic state space

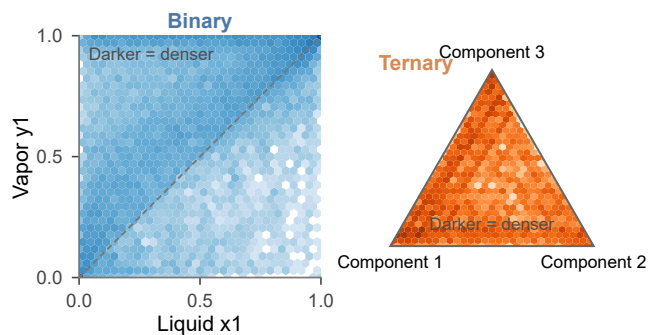

c Binary family-pair distribution

79 unordered family pairs

d Composition-space coverage

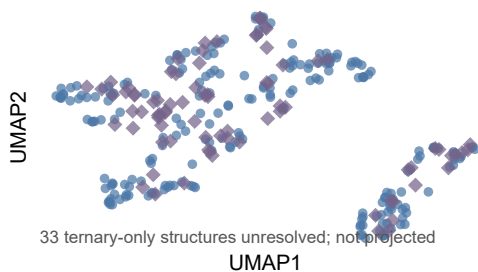

Liquid and vapor compositions

e Molecular chemical space

309 projected molecules · Morgan (r=2, 2,048 bits) + UMAP

● Binary only (228) ▲ Ternary only (0) ◆ Shared (81)

f Binary-to-ternary coverage

Constituent binary subsystems observed
