

a Dataset size

	Binary	Ternary
Data points	22,760	4,544
Systems	693	107
Components	328	111

b Thermodynamic state space**c Chemical-family coverage**

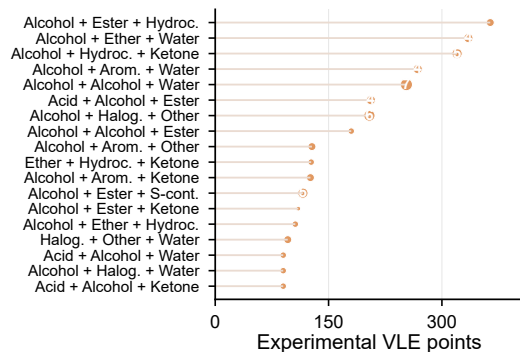

Binary pairs and ternary triplets

c1 Binary family-pair distribution

71 unordered family pairs

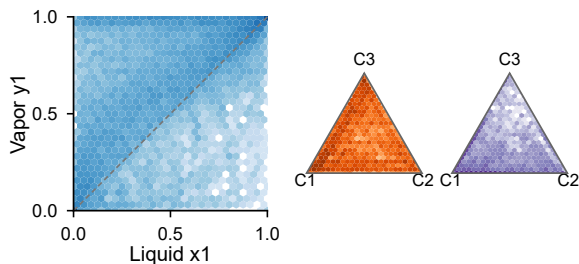

**c2 Ternary family-triplet distribution**

Top 18 by VLE points - 54 triplets in total

**d Liquid-vapor composition space**

Liquid (x) and vapor (y) compositions

Binary Ternary liquid Ternary vapor

**e Binary-to-ternary coverage**

Known constituent binary subsystems
